

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2004 as National Adoption Month. I call on all Americans to observe this month with appropriate programs and activities to honor adoptive families and to participate in efforts to find permanent homes for waiting children.

IN WITNESS WHEREOF, I have hereunto set my hand this fourth day of November, in the year of our Lord two thousand four, and of the Independence of the United States of America the two hundred and twenty-ninth.

GEORGE W. BUSH

**Proclamation 7839 of November 4, 2004**

**National Alzheimer's Disease Awareness Month, 2004**

*By the President of the United States of America*

*A Proclamation*

Today, it is estimated that over 4 million Americans suffer from Alzheimer's disease. A progressive, degenerative disorder of the brain, Alzheimer's robs individuals of their memory and their mental and physical functions, leading to increasing dependence on others for care. Factors such as age and family history can contribute to the risk of developing this disease. While no cure exists yet, researchers are learning more about this disease and how to enhance the quality of life for those with Alzheimer's.

President Reagan believed in the courage and capacity of the American people to overcome any obstacle, and my Administration remains committed to funding medical research programs to find a cure for Alzheimer's disease and improving care for Alzheimer's patients and increasing support for their families. The National Institutes of Health plans to spend \$680 million in Alzheimer's research in 2004 and an estimated \$699 million in 2005, a 33 percent increase from 2001. The National Institutes of Health, along with the Department of Veterans Affairs, is testing drugs for prevention and treatment of Alzheimer's disease. This year, the National Institute on Aging launched the Alzheimer's Disease Neuroimaging Initiative, an innovative partnership with the private sector that is using the latest technologies to observe changes in the brains of individuals who are affected by Alzheimer's. This project is researching ways to enhance early diagnosis and further the development of treatments. In addition, the Administration on Aging is working with States to improve home and community-based services for people with dementia and their families.

As we observe National Alzheimer's Disease Awareness Month, we recognize our citizens who are living with this disease and extend our gratitude to those who provide vital care and support. We also specially recognize the public and private scientists, researchers, nurses, and health care providers who are dedicated to finding new and better ways to help patients and ultimately find a cure for Alzheimer's disease. Their efforts bring comfort to many and offer hope for the future.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2004 as National Alzheimer's Disease Awareness Month. I call upon the people of the United States to observe this month with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this fourth day of November, in the year of our Lord two thousand four, and of the Independence of the United States of America the two hundred and twenty-ninth.

GEORGE W. BUSH

**Proclamation 7840 of November 4, 2004**

**National American Indian Heritage Month, 2004**

*By the President of the United States of America  
A Proclamation*

As the first people to call our country home, American Indians and Alaska Natives have a noble history in this land and have long shaped our Nation. During National American Indian Heritage Month, we celebrate our commitment to respect and preserve the rich Native American traditions and cultures.

The enduring experiences of tribal communities are a cherished part of our national story. In September, I was proud to meet with tribal leaders and celebrate the opening of the Smithsonian Institution's National Museum of the American Indian on the National Mall in Washington, D.C. This new facility stands as a powerful symbol of the pride and vitality of our Native Peoples. The museum showcases masterworks of great cultural, historical, and spiritual significance. Through exhibits documenting past and present achievements and hopes for the future, it will introduce generations of visitors to the strong and living traditions of Native Americans. As a center for scholarship and learning, the National Museum of the American Indian will also advance understanding of the diversity that makes our Nation great.

My Administration is committed to helping Native Americans as they build on their proud legacy. With the funding of my 2005 budget, we will have provided the Bureau of Indian Affairs with more than \$1.1 billion for school construction and repairs during the past 4 years. To improve education for American Indian and Alaska Native children, I signed an executive order establishing an Interagency Working Group to help students meet the standards set by the No Child Left Behind Act of 2001 in a manner that is consistent with tribal traditions, languages, and cultures. By setting standards for academic achievement and cultural learning, Americans in all communities can help their children realize a brighter future. I also signed an executive memorandum to all Federal agencies affirming the Federal Government's continuing commitment to recognize tribal sovereignty and self-determination. As they have in the past, tribal governments will maintain
